ABOUT ME

I have recently completed the **Professional Web Developer Course** at Master D, and I am motivated to contribute my skills to InnoTech.

My background includes hands-on experience in building web applications with **HTML/CSS, BOOTSTRAP, JavaScript, PHP** and **MySQL**. I am also developing a strong interest in test automation and quality assurance. While I am at an early stage in my professional journey, I am eager to grow and I already value agile workflows, structured testing and delivering reliable software.

I see myself as organized, communicative and pratical in problem-solving. I thrive in collaborative environments, welcome feedback as a learning opportunity and remain curious about exploring new technologies and approaches.

With my commitment to quality and adptability, I believe I could add value to InnoTech's mission of delivering innovative and user-focused digital solutions, while also developing further as part of your team.
