

PEDRO COSTA

Web Developer

+351 915 837 393

pcostaaaa@gmail.com

Pombal, Leiria, Portugal

PROFESSIONAL SUMMARY:

Highly motivated **Frontend Developer** with a strong foundation in building functional, full-stack web applications. Recently specialized in the **React ecosystem (React, Next.js, Redux)** through advanced intensive training. With a academic and professional background in **Computer Management** and **Telecommunications**, I bring a disciplined, technical approach to complex problem-solving and modern UX/UI implementation.

EDUCATION & CERTIFICATIONS:

2026 | Udemy

The Ultimate React Course: React, Next.js, Redux & More

- Advanced state management with **Redux Toolkit** and Context API;
- Building high-performance SSR/SSG applications using **Next.js**;
- Developed complex hooks and integrated various third-party APIs.

2026 | Udemy

The Complete JavaScript Course: From Zero to Expert!

- Mastery of ES6+, Asynchronous JavaScript (Promises/Async-Await) and OOP.

2024 - 2025 | Master Distância, Lda

Professional Web Development Training Course

- Development of web products in HTML/CSS, BOOTSTRAP, JavaScript, PHP and MySQL;
- Building, testing and maintaining digital products;
- Creating databases to support websites;

WEB DEVELOPMENT PROJECTS:

The Wild Oasis | Full-Stack Internal Management & Booking System

Professional Portfolio - React Specialization

- Execution:** Developed a dual-platform application including a comprehensive admin dashboard for staff and a customer-facing booking website.
- Result:** A fully synchronized ecosystem featuring secure authentication and real-time data management, streamlining the hotel's check-in/out flow and booking analytics.
- Stack:** Built using React, Next.js, React Query, Styled Components and Supabase.

React Quiz | High-Performance State Management App

Professional Portfolio - React Specialization

- Execution:** Designed an interactive quiz application focused on optimized state transitions and performance.
- Functionality:** Successfully implemented complex UI logic and timers using **useReducer** hook, resulting in a highly performant application with zero unnecessary re-renders.
- Stack:** Built using **React** and **ContextAPI**.

Eventhive | Full-Stack Event Management System

Final Project - Web Development Training Course | October 2024 - September 2025

- Execution:** Developed a robust system featuring user registration, secure login and a dedicated admin panel.
- Functionality:** Built full CRUD capabilities for event management and integrated a functional shopping cart for ticket purchasing.
- Stack:** Built using HTML, CSS, Bootstrap, JavaScript, PHP and MySQL.

WORK EXPERIENCE:

Ondivolt - Electrical Installations | Apprentice Electrician November 2024 - June 2025

Optilink Lda | Telecommunications Technician December 2018 - July 2024

Jerónimo Martins (Pingo-Doce) | Cashier September 2016 - October 2018

TECHNICAL SKILLS:

- Frontend:** JavaScript(ES6+), PHP, HTML5, CSS3
- Backend & Tools:** MySQL, WordPress, Supabase
- Libraries/Frameworks:** React, Next.js, Redux, Bootstrap
- Soft skills:** Accountability, Critical Thinking, Communication, Teamwork, Curiosity, Time Management, Growth Mindset, Proactivity, Self-reliance
- Languages:** Portuguese (native), English C1 (spoken and written)
